Collaborator ...

```
{
  "Title": "Enhancement: Add Example for Fine-tuning GPT on Custom Dataset",
  "Body": "### Issue Description\nCurrently, the OpenAI-cookbook lacks an example that demonstrates how to fine-tune a GPT model using a custom dataset. This would be highly beneficial for users who want to adapt models to their specific tasks or domains.\n\n### Suggested Solution\nAdd a detailed guide or notebook that walks users through the process of preparing a custom dataset, setting up the training environment, and fine-tuning a GPT model (e.g., GPT-3.5) on this dataset using OpenAI's API or any open-source alternative. It should include:\n- Dataset preprocessing steps\n- Fine-tuning commands or code snippets\n- Evaluation of the model post-fine-tuning\n\n### Benefits\nThis feature will allow users to better understand and apply fine-tuning techniques, enabling more tailored solutions for their specific use cases.\n\n### Additional Context\nRelevant documentation or tutorials from OpenAI's API and any existing models in the cookbook should be linked for easy reference."
}
```
