

Hemangi Modi A20529403

Screenshot:1

I've updated the h.java file by adding my GitHub ID (HFA24SCM03M) to meet the assignment requirements. The modification ensures that my GitHub ID is properly included in the file.

Screenshot:2

In the second screenshot, you can see that I successfully ran the git push origin main command in the terminal. The message "Everything up-to-date" confirms that all my changes, including the update to the h.java file, were successfully committed and pushed to my GitHub repository. This shows that everything is properly synchronized with the remote repository.
